CRE-025HM / K

Flow Switch CRE

- Can be used from nominal width DN 25..200
- Suitable for media with ferritic particles

Characteristics

The devices function via the principle of a paddle supported by a metal bellows, and the triggering of a micro switch.

Dimensions

Adapt paddle 1 for DN 25.
 From DN 100, adapt paddle 4:
 DN 100 Paddle length 92
 DN 125 Paddle length 117
 DN 150 Paddle length 143
 from DN 175 unshortened

Handling and operation

Note

- Attention! Paddle fixing unsecured. For critical conditions (e.g. vibration), fit a bolted fixing.
- Include straight calming section of 10 x DN in inlet and outlet
- If the media are dirty, install a filter.
- It must be ensured that the values given for voltage, current, and power are not exceeded.
- When switched on, a load must be connected in series.
- The electrical details apply to ohmic loads.
 Capacitive and inductive loads must be operated using a protective circuit.

Loosen adjustment

Screw, and remove hood; set the desired switching value using the adjustment screw, and refasten the hood.

Installation recommendation

Use a tube with standard wall thickness as per DIN 2448
